

Name	Francis Chung
Designation	Platform Development Engineer
Company	Continental Automotive
Website	http://www.continental-corporation.com

“The automotive industry has become more and more demanding on not just having a car radio system inside the car that plays music from the radio, CD or other music sources. At Continental Automotive, we need to meet the developing car entertainment head-units that can deliver world class sound systems in the car, and for our engineers to be trained in audio and acoustics, SAE Institute has the right expertise in knowing this field from basics of audio engineering to mastering of recordings from a studio environment. Being international, SAE Institute also has an excellent pool of trainers of diverse backgrounds to keep up-to-date of technologies around the world, to give us a truly world-class training.”

Name	Billy Fong
Designation	Technical Manager / Producer
Company	VHQ POST (S) PTE LTD

“Being in the media industry, while everything moves in light speed, what we need are individuals that can help us. SAE Institute’s interns did exactly just that. Not only did they excel in their technical know-how, their attitude scores with a capital ‘A’. I would highly recommend SAE Institute to every media enthusiast.”

Name	Benedict Chia
Designation	HR Consultant
Company	Tan Tock Seng Hospital
Website	www.ttsh.com.sg

“When our organization’s (TTSH) Multimedia & eLearning team needed some professional help on improving our in-house training videos, we approached a number of vendors. SAE Institute in particular stood out. They shared valuable insights on how to tackle some of our projects and ways to enhance the skill set of our in-house media development team at the same time. I am impressed by their level of professionalism from scoping out a project to delivering the end product. Also notable is that they give their students real world problems/projects to work on, as well as their dedication to solving problems that their customers are facing”.
